GULF RESOURCES, INC.
AND SUBSIDIARIES
NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS
MARCH 31, 2020
(Expressed in U.S. dollars)
(UNAUDITED)

NOTE 1 – BASIS OF PRESENTATION AND SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

(a) Basis of Presentation and Consolidation

The accompanying condensed financial statements have been prepared by Gulf Resources, Inc (“Gulf Resources”) a Nevada corporation and its subsidiaries (collectively, the “Company”), without audit, in accordance with the instructions to Form 10-Q and, therefore, do not necessarily include all information and footnotes necessary for a fair statement of its financial position, results of operations and cash flows in accordance with accounting principles generally accepted in the United States (“US GAAP”).

In the opinion of management, the unaudited financial information for the quarter ended March 31, 2020 presented reflects all adjustments, which are only normal and recurring, necessary for a fair statement of results of operations, financial position and cash flows. These condensed financial statements should be read in conjunction with the financial statements included in the Company’s Annual Report on Form 10-K for the fiscal year ended December 31, 2019. Operating results for the interim periods are not necessarily indicative of operating results for an entire fiscal year.

The preparation of financial statements in conformity with US GAAP requires management to make estimates and assumptions that affect the amounts that are reported in the financial statements and accompanying disclosures. Although these estimates are based on management’s best knowledge of current events and actions that the Company may undertake in the future, actual results may be different from the estimates. The Company also exercises judgments in the preparation of these condensed financial statements in the areas including classification of leases and related party transactions.

The consolidated financial statements include the accounts of Gulf Resources, Inc. and its wholly-owned subsidiary, Upper Class Group Limited, a company incorporated in the British Virgin Islands, which owns 100% of Hong Kong Jiaxing Industrial Limited, a company incorporated in Hong Kong (“HKJI”). HKJI owns 100% of Shouguang City Haoyuan Chemical Company Limited (“SCHC”) which owns 100% of Shouguang Yuxin Chemical Industry Co., Limited (“SYCI”) and Daying County Haoyuan Chemical Company Limited (“DCHC”). All material intercompany transactions have been eliminated on consolidation.

(b) Nature of the Business

The Company manufactures and trades bromine and crude salt through its wholly-owned subsidiary, Shouguang City Haoyuan Chemical Company Limited (“SCHC”), which is also planning to engage in seawater desalination technology research and service and to handle the import and export of goods and technologies within the scope permitted by the State. The Company also manufactures chemical products for use in the oil industry, pesticides, paper manufacturing industry and for human and animal antibiotics through its wholly-owned subsidiary, Shouguang Yuxin Chemical Industry Co., Limited (“SYCI”) in the People’s Republic of China (“PRC”). DCHC was established to further explore and develop natural gas and brine resources (including bromine and crude salt) in the PRC. DCHC commenced trial operation in January 2019 but suspended production temporarily in May 2019 as required by the government to obtain project approval (see Note 1 (b)(iii) below).

On March 11, 2020, the World Health Organization (WHO) officially declared COVID-19 a pandemic, pointing to the over 118,000 cases of COVID-19 illness in over 110 countries and territories around the world and the sustained risk of further global spread. On May 8, 2020, WHO reported that there were more than 3.8 million of confirmed cases of COVID-19 including 259,593 deaths globally. Given this fact, the duration and intensity of the impact of the COVID-19 and resulting disruption to the Company’s operations is uncertain. While our operations are currently not materially affected, it is unknown whether or how they may be affected if such a pandemic persists for an extended period. While not yet quantifiable, the Company believes this situation did not have a material adverse impact on its operating results in the first quarter of 2020 and will continue to assess the financial impact for the remainder of the year.

(i) Bromine and Crude Salt Segments

On November 25, 2019, the government of Shouguang City issued a notice ordering all bromine facilities in Shouguang City, including the Company’s bromine facilities, including Factory No.1 and Factory No. 7, to temporarily stop production from December 16, 2019 to February 10, 2020. Subsequently, due to the coronavirus outbreak in China, the local government ordered those bromine facilities to postpone the commencement of production. Subsequently, the Company received an approval dated on February 27, 2020 issued by the local governmental authority which allowed the Company to resume production after the winter temporary closure. Further, the Company received another approval from the Shouguang Yangkou People’s Government dated on March 5, 2020 allowing the Company to resume production at its bromine factories No.1, No. 4 (which was renamed from Subdivision Factory No. 1), No.7 and No. 9 in order to meet the needs of bromide products for epidemic prevention and control (the “March 2020 Approval”). The Company’s Factories No. 1 and No. 7 commenced trial production in mid-March 2020 and commercial production on April 3, 2020 and its Factories No. 4 and No. 9 commenced commercial production on May 6, 2020.

(ii) Chemical Segment

On November 24, 2017, the Company received a letter from the Government of Yangkou County, Shouguang City notifying the Company to relocate its two chemical production plants located in the second living area of the Qinghe Oil Extraction to the Bohai Marine Fine Chemical Industrial Park (“Bohai Park”). This is because the two plants are located in a residential area and their production activities will impact the living environment of the residents. This is as a result of the country’s effort to improve the development of the chemical industry, manage safe production and curb environmental pollution accidents effectively, and ensure the quality of the living environment of residents. All chemical enterprises which do not comply with the requirements of the safety and environmental protection regulations will be ordered to shut down.

The Company believes this relocation process will cost approximately \$60 million in total. The Company incurred relocation costs comprising prepaid land lease and professional fees related to the design of the new chemical factory in the amount of \$14,082,476 and \$10,320,017, which were recorded in the prepaid land leases and property, plant and equipment in the consolidated balance sheets as of March 31, 2020 and December 31, 2019.

The Company has secured from the government the land use rights for its chemical plants located at the Bohai Park and presented a completed construction design draft and other related documents to the local authorities for approval. In January 2020, the Company obtained the environmental protection assessment approval performed by the government of Shouguang City, Shandong Province for the proposed new Yuxin chemical factory. With this approval, the Company is permitted to construct the new chemical factory which is expected to begin construction in the second quarter of 2020.

(iii) Natural Gas Segment

In January 2017, the Company completed the first brine water and natural gas well field construction in Daying located in Sichuan Province and commenced trial production in January 2019. On May 29, 2019, the Company received a verbal notice from the government of Tianbao Town ,Daying County, Sichuan Province, whereby the Company is required to obtain project approval for its well located in Daying, including the whole natural gas and brine water project, and approvals for safety production inspection, environmental protection assessment, and to solve the related land issue. Until these approvals have been received, the Company has to temporarily halt trial production at its natural gas well in Daying. In compliance with the Chinese government new policies, the Company is also required to obtain an exploration license and a mining license for bromine and natural gas, respectively. Pursuant to the Opinions of the Ministry of Natural Resources on Several Issues in Promoting the Reform of Mineral Resources Management (Trial) promulgated by the Ministry of Natural Resources of PRC on January 9, 2020, which came into effect on May 1, 2020, privately owned enterprises are allowed to participate in the oil and gas exploration and production. The Company plans to proceed with its applications for the natural gas and brine project approvals with related government departments.

(c) Allowance for Doubtful Accounts

As of March 31, 2020 and December 31, 2019, there were no allowances for doubtful accounts. No allowances for doubtful accounts were charged to the condensed consolidated statements of loss for the three-month periods ended March 31, 2020 and 2019.

The Company collected from its accounts receivable an amount of \$429,938 in April 2020 through May 16, 2020.

(d) Concentration of Credit Risk

The Company is exposed to credit risk in the normal course of business, primarily related to accounts receivable and cash and cash equivalents. Substantially all of the Company’s cash and cash equivalents are maintained with financial institutions in the PRC, namely, Industrial and Commercial Bank of China Limited, China Merchants Bank Company Limited and Sichuan Rural Credit Union, which are not insured or otherwise protected. The Company placed \$93,632,690 and \$100,301,986 with these institutions as of March 31, 2020 and December 31, 2019, respectively. The Company has not experienced any losses in such accounts in the PRC.

GULF RESOURCES, INC.
AND SUBSIDIARIES
NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS
MARCH 31, 2020
(Expressed in U.S. dollars)
(UNAUDITED)

NOTE 1 – BASIS OF PRESENTATION AND SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES – Continued

(e) Property, Plant and Equipment

Property, plant and equipment are stated at cost less accumulated depreciation and any impairment losses. Expenditures for new facilities or equipment, and major expenditures for betterment of existing facilities or equipment are capitalized and depreciated using the straight-line method at rates sufficient to depreciate such costs less 5% residual value over the estimated productive lives. All other ordinary repair and maintenance costs are expensed as incurred.

Mineral rights are recorded at cost less accumulated depreciation and any impairment losses. Mineral rights are amortized ratably over the term of the lease, or the equivalent term under the units of production method, whichever is shorter.

Construction in process primarily represents direct costs of construction of property, plant and equipment. Costs incurred are capitalized and transferred to property, plant and equipment upon completion and depreciation will commence when the completed assets are placed in service.

The Company's depreciation and amortization policies on property, plant and equipment, other than mineral rights and construction in process, are as follows:

	Useful life (in years)
Buildings (including salt pans)	8 - 20
Plant and machinery (including protective shells, transmission channels and ducts)	3 - 8
Motor vehicles	5
Furniture, fixtures and equipment	3-8

Property, plant and equipment under the capital lease are depreciated over their expected useful lives on the same basis as owned assets, or where shorter, the term of the lease.

Producing oil and gas properties are depreciated on a unit-of-production basis over the proved developed reserves. Common facilities that are built specifically to service production directly attributed to designated oil and gas properties are depreciated based on the proved developed reserves of the respective oil and gas properties on a pro-rata basis. Common facilities that are not built specifically to service identified oil and gas properties are depreciated using the straight-line method over their estimated useful lives. Costs associated with significant development projects are not depreciated until commercial production commences and the reserves related to those costs are excluded from the calculation of depreciation.

(f) Retirement Benefits

Pursuant to the relevant laws and regulations in the PRC, the Company participates in a defined contribution retirement plan for its employees arranged by a governmental organization. The Company makes contributions to the retirement plan at the applicable rate based on the employees' salaries. The required contributions under the retirement plans are charged to the condensed consolidated statement of income on an accrual basis when they are due. The Company's contributions totaled \$140,108 and \$310,937 for the three-month periods ended March 31, 2020 and 2019, respectively.

(g) Revenue Recognition

Net revenue is net of discount and value added tax and comprises the sale of bromine, crude salt and chemical products. Revenue is recognized when the control of the promised goods is transferred to the customers in an amount that reflects the consideration that the Company expects to receive from the customers in exchange for those goods. The acknowledgement of receipt of goods by the customers is when control of the product is deemed to be transferred. Invoicing occurs upon acknowledgement of receipt of the goods by the customers. Customers have no rights to return the goods upon acknowledgement of receipt of goods. Revenue from contracts with customers is disaggregated in Note 15.

(h) Recoverability of Long-lived Assets

In accordance with Financial Accounting Standards Board (“FASB”) Accounting Standards Codification (“ASC”) 360-10-35 “*Impairment or Disposal of Long-lived Assets*”, long-lived assets to be held and used are analyzed for impairment whenever events or changes in circumstances indicate that the carrying amount of an asset may not be fully recoverable or that the useful lives of those assets are no longer appropriate. The Company evaluates at each balance sheet date whether events and circumstances have occurred that indicate possible impairment.

The Company determines the existence of such impairment by measuring the expected future cash flows (undiscounted and without interest charges) and comparing such amount to the carrying amount of the assets. An impairment loss, if one exists, is then measured as the amount by which the carrying amount of the asset exceeds the discounted estimated future cash flows. Assets to be disposed of are reported at the lower of the carrying amount or fair value of such assets less costs to sell. Asset impairment charges are recorded to reduce the carrying amount of the long-lived asset that will be sold or disposed of to their estimated fair values. Charges for the asset impairment reduce the carrying amount of the long-lived assets to their estimated salvage value in connection with the decision to dispose of such assets.

For the three-month period ended March 31, 2020 and 2019, the Company determined that there were no events or circumstances indicating possible additional impairment of its long-lived assets.

(i) Basic and Diluted Net Income per Share of Common Stock

Basic earnings per common share are based on the weighted average number of shares outstanding during the periods presented. Diluted earnings per share are computed using weighted average number of common shares plus dilutive common share equivalents outstanding during the period. Potential common shares that would have the effect of increasing diluted earnings per share are considered to be anti-dilutive, i.e. the exercise prices of the outstanding stock options were greater than the market price of the common stock. Anti-dilutive common stock equivalents which were excluded from the calculation of number of dilutive common stock equivalents amounted to 113,370 and 67,598 shares for the three-month periods ended March 31, 2020 and 2019, respectively.

Because the Company reported a net loss for the three-month periods ended March 31, 2020 and 2019, common stock equivalents including stock options and warrants were anti-dilutive, therefore the amounts reported for basic and diluted loss per share were the same.

NOTE 1 – BASIS OF PRESENTATION AND SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES – Continued

(j) Reporting Currency and Translation

The financial statements of the Company's foreign subsidiaries are measured using the local currency, Renminbi ("RMB"), as the functional currency; whereas the functional currency and reporting currency of the Company is the United States dollar ("USD" or "\$").

As such, the Company uses the "current rate method" to translate its PRC operations from RMB into USD, as required under FASB ASC 830 "Foreign Currency Matters". The assets and liabilities of its PRC operations are translated into USD using the rate of exchange prevailing at the balance sheet date. The capital accounts are translated at the historical rate. Adjustments resulting from the translation of the balance sheets of the Company's PRC subsidiaries are recorded in stockholders' equity as part of accumulated other comprehensive income. The statement of income and comprehensive income is translated at average rate during the reporting period. Gains or losses resulting from transactions in currencies other than the functional currencies are recognized in net income for the reporting periods as part of general and administrative expense. The statement of cash flows is translated at average rate during the reporting period, with the exception of the consideration paid for the acquisition of business which is translated at historical rates.

(k) Foreign Operations

All of the Company's operations and assets are located in PRC. The Company may be adversely affected by possible political or economic events in this country. The effect of these factors cannot be accurately predicted.

(l) Inventories.

Inventories are stated at the lower of cost, determined on a first-in first-out cost basis, or net realizable value. Costs of work-in-progress and finished goods comprise direct materials, direct labor and an attributable portion of manufacturing overhead. Net realizable value is based on estimated selling price less costs to complete and selling expenses.

(m) Leases

The Company determines if an arrangement is a lease at inception. Operating leases are included in operating lease right-of-use ("ROU") assets and operating lease liabilities in the consolidated balance sheets. Finance leases are included in finance lease ROU assets and finance lease liabilities in the consolidated balance sheets.

ROU assets represent the Company's right to use an underlying asset for the lease term and lease liabilities represent the Company's obligation to make lease payments arising from the lease. Operating lease and finance lease ROU assets and liabilities are recognized at January 1, 2019 based on the present value of lease payments over the lease term discounted using the rate implicit in the lease. In cases where the implicit rate is not readily determinable, the Company uses its incremental borrowing rate based on the information available at commencement date in determining the present value of lease payments. Lease expense for lease payments is recognized on a straight-line basis over the lease term.

The Company does not recognize operating lease ROU assets and liabilities arising from lease arrangements with lease term of twelve months or less.

(n) Stock-based Compensation

Stock-based awards issued to employees are recorded at their fair values estimated at grant date using the Black-Scholes model and the portion that is ultimately expected to vest is recognized as compensation cost over the requisite service period. Consistent with the accounting requirement for employee stock-based awards, nonemployee stock-based awards are measured at the grant-date fair value of the equity instruments that the Company is obligated to issue when the good has been delivered or the service has been rendered and any other conditions necessary to earn the right to benefit from the instruments have been satisfied.

The Company has elected to account for the forfeiture of stock-based awards as they occur.

(o) Contingencies

The Company accrues for costs relating to litigation, including litigation defense costs, claims and other contingent matters, including liquidated damage liabilities, when such liabilities become probable and reasonably estimable. Such estimates may be based on advice from third parties or on management's judgment, as appropriate. Revisions to accruals are reflected in earnings (loss) in the period in which different facts or information become known or circumstances change that affect the Company's previous assumptions with respect to the likelihood or amount of loss. Amounts paid upon the ultimate resolution of such liabilities may be materially different from previous estimates.

(p) Income Tax

The Company accounts for income taxes in accordance with the Income Taxes Topic of the FASB ASC, which requires the use of the liability method of accounting for deferred income taxes. Under this method, deferred income taxes are recorded to reflect the tax consequences on future years of temporary differences between the tax basis of assets and liabilities and their reported amounts at each period end. Deferred tax assets and liabilities are measured using tax rates that are expected to apply to taxable income for the years in which those tax assets and liabilities are expected to be realized or settled. The deferred income tax effects of a change in tax rates are recognized in the period of enactment. If it is more likely than not that some portion or all of a deferred tax asset will not be realized, a valuation allowance is recognized. The guidance also provides criteria for the recognition, measurement, presentation and disclosures of uncertain tax positions. A tax benefit from an uncertain tax position may be recognized if it is “more likely than not” that the position is sustainable based solely on its technical merits. Interests and penalties associated with unrecognized tax benefits are included within the (benefit from) provision for income tax in the consolidated statement of profit (loss).

(q) New Accounting Pronouncements

Recent accounting pronouncements adopted

There were no recent accounting pronouncements adopted during the three months ended March 31, 2020.

Recently Issued Accounting Pronouncements Not Yet Adopted

In June 2016, the FASB issued ASU No. 2016-13, Financial Instruments – Credit Losses (Topic 326), Measurement of Credit Losses on Financial Instruments. The amendments in this Update affect loans, debt securities, trade receivables, and any other financial assets that have the contractual right to receive cash. The ASU requires an entity to recognize expected credit losses rather than incurred losses for financial assets. For public entities, the amendments are effective for fiscal years beginning after December 15, 2019, including interim periods within those fiscal years. For the Company which is a smaller reporting company, ASU No. 2019-10 extends the effective dates for two years. The Company is currently evaluating the effect of this on the condensed consolidated financial statements and related disclosure.

Reverse Stock Split and Authorized Shares

On January 27, 2020, the Company completed a 1-for-5 reverse stock split of the company's common stock, such that for each five shares outstanding prior to the stock split there was one share outstanding after the reverse stock split. All shares of common stock referenced in this report have been adjusted to reflect the stock split figures.

There is no change to the authorized shares of the Company' common stock which remain at 80,000,000.

Retained Earnings – Appropriated

In accordance with the relevant PRC regulations and the PRC subsidiaries' Articles of Association, the Company's PRC subsidiaries are required to allocate its profit after tax to the following reserve:

Statutory Common Reserve Funds

SCHC, SYCI and DCHC are required each year to transfer at least 10% of the profit after tax as reported under the PRC statutory financial statements to the Statutory Common Reserve Funds until the balance reaches 50% of the registered share capital. This reserve can be used to make up any loss incurred or to increase share capital. Except for the reduction of losses incurred, any other application should not result in this reserve balance falling below 25% of the registered capital. The Statutory Common Reserve Fund as of March 31, 2020 for SCHC, SYCI and DCHC is 16%, 14% and 0% of its registered capital respectively.

NOTE 12 – TREASURY STOCK

In January 2019, the Company issued 4,000 shares of common stock from the treasury shares to one of its consultants. The shares were valued at the closing market price on the date of the agreement and recorded as general and administrative expense in the consolidated statement of loss and comprehensive loss for the year ended December 31, 2019. The shares issued were deducted from the treasury shares at weighted average cost and the excess of the cost over the closing market price was charged to additional paid-in-capital.

On September 13, 2019, the Company received a staff deficiency notice from The Nasdaq Stock Market informing the Company that it has failed to comply with Nasdaq's shareholder approval requirements relating to shares issued to this consultant. A total of 8,000 restricted shares issued to this consultant from treasury was canceled. On January 14, 2020, the Company reissued the shares from the 2019 Omnibus Equity Incentive Plan adopted by the board of directors of the Company and approved by the stockholders at the annual stockholders meeting held on December 18, 2019.

On January 23, 2020, the Company received a letter from the Nasdaq Stock Market Listing Qualifications Staff (the "Staff") notifying that the Company has regained compliance with the shareholder approval requirements set forth in Nasdaq Listing Rule 5635(c) in connection with shares issued to a consultant based on the Staff's review of the Company's submitted materials.

NOTE 13 – STOCK-BASED COMPENSATION

Pursuant to the Company's 2019 Omnibus Equity Incentive Plan adopted and approved in 2019 ("2019 Plan"), awards under the 2019 Plan is limited in the aggregate to 2,068,398 shares of our common stock, inclusive of the awards that were previously issued and outstanding under the Company's 2007 Equity Incentive Plan, as amended (the "2007 Plan"). Upon adoption and approval of the 2019 Plan, the 2007 Plan was frozen, no new awards will be granted under the 2007 Plan, and outstanding awards under the 2007 Plan will continue to be governed by the terms and condition of the 2007 Plan and applicable award agreement. As of March 31, 2020, the number of shares of the Company's common stock available for grant of stock options and issuance under the 2019 Plan is 984,698 shares.

The fair value of each option award is estimated on the date of grant using the Black-Scholes option-pricing model. The risk free rate is based on the yield-to-maturity in continuous compounding of the US Government Bonds with the time-to-maturity similar to the expected tenor of the option granted, volatility is based on the annualized historical stock price volatility of the Company, and the expected life is based on the historical option exercise pattern.

For the three months ended March 31, 2020 and 2019, total compensation costs for options issued recorded in the consolidated statement of loss were \$0.

During the three months ended March 31, 2020, there were no options issued to employees or non-employees.

NOTE 14 – INCOME TAXES

The Company utilizes the asset and liability method of accounting for income taxes in accordance with FASB ASC 740-10. If it is more likely than not that some portion or all of a deferred tax asset will not be realized, a valuation allowance is recognized.

(a) United States (“US”)

Gulf Resources, Inc. may be subject to the United States of America Tax laws at a tax rate of 21%. No provision for the US federal income taxes has been made as the Company had no US taxable income for the three-month periods ended March 31, 2020 and 2019, and management believes that its earnings are permanently invested in the PRC.

(b) British Virgin Islands (“BVI”)

Upper Class Group Limited, a subsidiary of Gulf Resources, Inc., was incorporated in the BVI and, under the current laws of the BVI, it is not subject to tax on income or capital gain in the BVI. Upper Class Group Limited did not generate assessable profit for the three-month periods ended March 31, 2020 and 2019.

(c) Hong Kong

HKJI, a subsidiary of Upper Class Group Limited, was incorporated in Hong Kong and is subject to Hong Kong taxation on its activities conducted in Hong Kong and income arising in or derived from Hong Kong. No provision for income tax has been made as it has no taxable income for the three-month periods ended March 31, 2020 and 2019. The applicable statutory tax rates for the three-month periods ended March 31, 2020 and 2019 are 16.5%. There is no dividend withholding tax in Hong Kong.

(d) PRC

Enterprise income tax (“EIT”) for SCHC, SYCI and DCHC in the PRC is charged at 25% of the assessable profits.

The operating subsidiaries SCHC, SYCI and DCHC are wholly foreign-owned enterprises (“FIE”) incorporated in the PRC and are subject to PRC Local Income Tax Law. The PRC tax losses may be carried forward to be utilized against future taxable profit for ten years for High-tech enterprises and small and medium-sized enterprises of science and technology and for five years for other companies. Tax losses of the operating subsidiaries of the Company may be carried forward for five years.

On February 22, 2008, the Ministry of Finance (“MOF”) and the State Administration of Taxation (“SAT”) jointly issued Cai Shui [2008] Circular 1 (“Circular 1”). According to Article 4 of Circular 1, distributions of accumulated profits earned by a FIE prior to January 1, 2008 to foreign investor(s) in 2008 will be exempted from withholding tax (“WHT”) while distribution of the profit earned by an FIE after January 1, 2008 to its foreign investor(s) shall be subject to WHT at 5% effective tax rate.

As of March 31, 2020 and December 31, 2019, the accumulated distributable earnings under the Generally Accepted Accounting Principles (“GAAP”) of PRC that are subject to WHT are \$117,493,604 and \$124,616,722, respectively. Since the Company intends to reinvest its earnings to further expand its businesses in mainland China, its foreign invested enterprises do not intend to declare dividends to their immediate foreign holding companies in the foreseeable future. Accordingly, as of March 31, 2020 and December 31, 2019, the Company has not recorded any WHT on the cumulative amount of distributable retained earnings of its foreign invested enterprises that are subject to WHT in China. As of March 31, 2020 and December 31, 2019, the unrecognized WHT are \$4,913,388 and \$5,254,560, respectively.

The Company’s income tax returns are subject to the various tax authorities’ examination. The federal, state and local authorities of the United States may examine the Company’s income tax returns filed in the United States for three years from the date of filing. The Company’s US income tax returns since 2015 are currently subject to examination.

Inland Revenue Department of Hong Kong (“IRD”) may examine the Company’s income tax returns filed in Hong Kong for seven years from date of filing. For the years 2012 through 2019, HKJI did not report any taxable income. It did not file any income tax returns during these years except for 2014 and 2018. For companies which do not have taxable income, IRD typically issues notification to companies requiring them to file income tax returns once in every four years. The tax returns for 2014 and 2018 are currently subject to examination.

NOTE 15 – BUSINESS SEGMENTS – Continued

An operating segment's performance is primarily evaluated based on segment operating income, which excludes share-based compensation expense, certain corporate costs and other income not associated with the operations of the segment. These corporate costs (income) are separately stated below and also include costs that are related to functional areas such as accounting, treasury, information technology, legal, human resources, and internal audit. The Company believes that segment operating income, as defined above, is an appropriate measure for evaluating the operating performance of its segments. All the customers are located in PRC.

NOTE 20 – LOSS CONTINGENCIES

On or about August 3, 2018, written decisions of administration penalty captioned Shou Guo Tu Zi Fa Gao Zi [2018] No. 291, Shou Guo Tu Zi Fa Gao Zi [2018] No. 292, Shou Guo Tu Zi Fa Gao Zi [2018] No. 293, Shou Guo Tu Zi Fa Gao Zi [2018] No. 294, Shou Guo Tu Zi Fa Gao Zi [2018] No. 295 and Shou Guo Tu Zi Fa Gao Zi [2018] No. 296 (together, the "Written Decisions") were served on Shouguang City Haoyuan Chemical Company Limited ("SCHC") by the Shouguang City Natural Resources and Planning Bureau (the "Bureau"), naming SCHC as respondent. The written Decisions challenged the land use of Factory nos. 2, 9, 7, 4, 8 and 10, respectively, and alleged, among other things, that SCHC had illegally occupied and used the land in the total area of approximately 52,674 square meter, on which Factory nos. 2, 9, 7, 4, 8 and 10 were built. The Written Decisions ordered SCHC, among other things, to return the land subject to the Written Decisions to its respective legal owner, restore the land to its original state, and demolish or confiscate all the buildings and facilities thereon and pay monetary penalty of approximately RMB 1.3 million (\$184,000) in the aggregate. Each of the Written Decisions was to be executed within 15 days upon serving on SCHC. Additional interest penalty would be imposed at a daily rate of 3% in the event that SCHC did not make the monetary penalty payment in a timely manner. As discussed below, the Company did not believe the local government would enforce the penalties so it did not make the payment. Subsequently, the Bureau filed enforcement actions to the People's Court of Shouguang City, Shandong Province (the "Court"), naming SCHC as enforcement respondent and alleged, among other things, that SCHC failed to perform its obligations under each of the Written Decisions within the specified timeframe. The enforcement proceedings sought court orders to enforce the Written Decisions. On May 5, 2019, written decisions of administrative ruling captioned (2019) Lu 0783 Xing Shen No. 384, (2019) Lu 0783 Xing Shen No. 385, (2019) Lu 0783 Xing Shen No. 389, (2019) Lu 0783 Xing Shen No. 390, (2019) Lu 0783 Xing Shen No. 393, and (2019) Lu 0783 Xing Shen No. 394, respectively (together, the "Court Rulings") were made by the Court in favor of the Bureau. The Court ordered, among other relief, to enforce each of the Written Decisions, to return each subject land to its legal owner and demolish or confiscate the buildings and facilities thereon and restore the land to its original state within 10 days from the service of the Court Rulings on SCHC. The Court Rulings became enforceable immediately upon service on SCHC on May 5, 2019.

The Company has been in the process of resolving the issues in connection with SCHC's land use and planning diligently. The Company has been in close discussions with the local government authorities with the help from Shouguang City Bromine Association to seek reliefs and, based on verbal confirmation by local government authorities, believes the administrative penalties imposed by the Bureau according to the Written Decisions are being re-assessed by local government authorities and may be revoked. As of the date of this report, the Company has obtained one written confirmation from the local government authorities that the administrative penalty imposed on Factory No. 7, Factory No. 8 and Factory No.10 are being revoked which are subject to the Court's formal approval, and production of Factory No. 7 was allowed to resume in April 2019. The Bureau filed an application, dated October 28, 2019, to the Court to withdraw the enforcement actions that were filed against SCHC to seek court orders to enforce Written Decisions No. Shou Guo Tu Zi Fa Gao Zi [2018] No. 293, Shou Guo Tu Zi Fa Gao Zi [2018] No. 295 and Shou Guo Tu Zi Fa Gao Zi [2018] No. 296. In addition, on August 28, 2019, the People's Government of Shandong Province, issued a regulation titled "Investment Project Management Requirements of Chemical Companies in Shandong Province" permitting the construction of facilities on existing sites or infrastructure of bromine manufacturing and other chemical industry-related types of projects (clause 11 of section 3). The Company believes that the goal of the government is to standardize and regulate the industry and not to demolish the facilities or penalize the manufacturers. As of the date of this report, the Company has not been notified by the local government that it will take any measure to enforce the administrative penalties. Based on information known to date, the Company believes that it is remote that the Written Decisions or Court Rulings will be enforced within the expected timeframe and a material penalty or costs and expenses against the Company will result. However, there can be no assurance that there will not be any further enforcement action, the occurrence of which may result in further liabilities, penalties and operational disruption.

In view of the above facts and circumstances, the Company believes that it is not necessary to accrue for any estimated losses or impairment as of March 31, 2020.

Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations

Cautionary Note Regarding Forward-Looking Statements

The discussion below contains "forward-looking statements" within the meaning of the Private Securities Litigation Reform Act of 1995, Section 27A of the Securities Act, and Section 21E of the Exchange Act. We have used words such as "believes," "intends," "anticipates," "expects" and similar expressions to identify forward-looking statements. These statements are based on information currently available to us and are subject to a number of risks and uncertainties that may cause our actual results of operations, financial condition, cash flows, performance, business prospects and opportunities and the timing of certain events to differ materially from those expressed in, or implied by, these statements. Except as expressly required by the federal securities laws, we undertake no obligation to update such factors or to publicly announce the results of any of the forward-looking statements contained herein to reflect future events, developments, or changed circumstances, or for any other reason.

Overview

We are a holding company which conducts operations through our wholly-owned China-based subsidiaries. Our business is conducted and reported in four segments, namely, bromine, crude salt, chemical products and natural gas.

Through our wholly-owned subsidiary, SCHC, we produce and trade bromine and crude salt. We are one of the largest producers of bromine in China, as measured by production output. Elemental bromine is used to manufacture a wide variety of bromine compounds used in industry and agriculture. Bromine also is used to form intermediary chemical compounds such as Tetramethylbenzidine. Bromine is commonly used in brominated flame retardants, fumigants, water purification compounds, dyes, medicines and disinfectants. Crude salt is the principal material in alkali production as well as chlorine alkali production and is widely used in the chemical, food and beverage, and other industries. SCHC is also planning to do Seawater desalination; Seawater desalination technology research and service; To handle the import and export of goods and technologies within the scope permitted by the state.

Through our wholly-owned subsidiary, SYCI, we manufacture and sell chemical products used in oil and gas field exploration, oil and gas distribution, oil field drilling, papermaking chemical agents, inorganic chemicals and materials that are used for human and animal antibiotics.

Our wholly-owned subsidiary, DCHC, was established to explore and develop natural gas and brine resources (including bromine and crude salt) in Sichuan Province, China.

Recent Developments

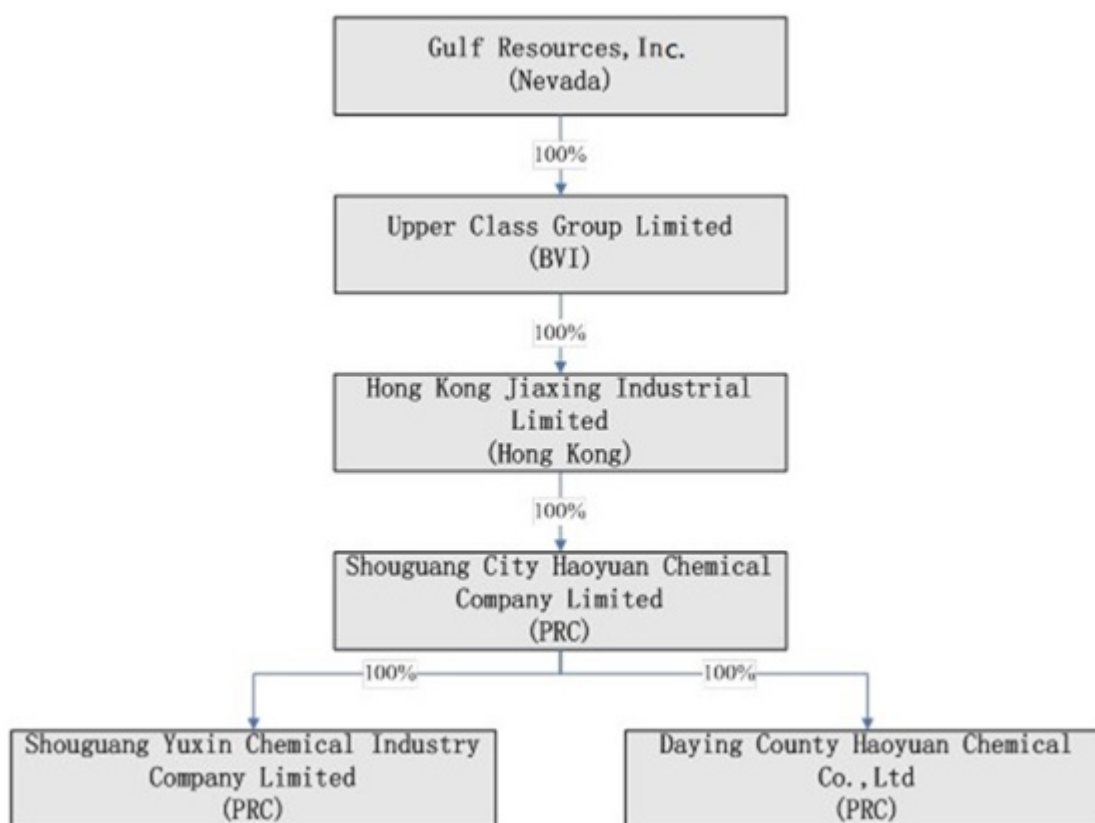

On September 21, 2018, the Company received a closing notice from the People's Government of Yangkou Town, Shouguang City informing it that its three bromine factories (No. 3, No. 4, and No. 11.) are not allowed to resume production and hence the Company has to demolish these factories. The crude salt fields surrounding these factories have been reclaimed as cultivated or construction land and hence did not meet the requirement for bromine and crude salt co-production set by the relevant authority.

In January 2017, the Company completed the first brine water and natural gas well field construction in Daying located in Sichuan Province and commenced trial production in January 2019. On May 29, 2019, the Company received a verbal notice from the government of Tianbao Town, Daying County, Sichuan Province, whereby the Company is required to obtain project approval for its well located in Daying, including the whole natural gas and brine water project, and approvals for safety production inspection, environmental protection assessment, and to solve the related land issue. Until these approvals have been received, the Company has to temporarily halt trial production at its natural gas well in Daying. In compliance with the Chinese government new policies, the Company is also required to obtain an exploration license and a mining license for bromine natural gas, respectively. Pursuant to the Opinions of the Ministry of Natural Resources on Several Issues in Promoting the Reform of Mineral Resources Management (Trial) promulgated by the Ministry of Natural Resources of PRC on January 9, 2020, which came into effect on May 1, 2020, privately owned enterprises are allowed to participate in the oil and gas exploration and production. The Company plans to proceed with its applications for the natural gas and brine project approvals with related government departments.

The Company received an approval from the Shouguang Yangkou People's Government dated on March 5, 2020 allowing the Company to resume production at its bromine factories No.1, No. 4 (which was renamed from Subdivision Factory No. 1), No.7 and No. 9 in order to meet the needs of bromide products for epidemic prevention and control. As of the date of this report, all those four bromine factories have commenced commercial production of bromine and crude salt.

At the present time, our chemical factory SYCI is closed pursuant to the letter from government dated on November 24, 2017. It will be relocated to Bohai Marine Fine Chemical Industry Park, Shouguang City. To date, we have secured the land for our new chemical factory. The Company also has had the final approval regarding environmental protection assessment. The Company expects to start our new chemical factory construction within the second quarter of 2020.

Our current corporate structure chart is set forth in the following diagram:

As a result of our acquisitions of SCHC and SYCI, our historical financial statements and the information presented below reflects the accounts of SCHC, SYCI and DCHC. The following discussion should be read in conjunction with our condensed consolidated financial statements and notes thereto appearing elsewhere in this report.

RESULTS OF OPERATIONS

The following table presents certain information derived from the condensed consolidated statements of income, cash flows and stockholders' equity for the three-month periods ended March 31, 2020 and 2019.

Bromine segment

For the three-month periods ended March 31, 2020 and 2019, the net revenue for the bromine segment was \$462,846 and \$0, respectively, due to the closure of our plant and factories to perform rectification and improvements in 2019 through mid-March 2020, except for the second quarter and part of the third quarter of 2019 when factory no. 1 and factory no. 7 resumed production.

Crude salt segment

For the three-month periods ended March 31, 2020 and 2019, the net revenue for the crude salt was \$94,824 and \$0 due to the closure of our plant and factories to perform rectification and improvements in 2019 through mid-March 2020 except for the second quarter and part of the third quarter of 2019 when factory no. 1 and factory no. 7 resumed production.

Chemical products segment

For the three-month periods ended March 31, 2020 and 2019, the net revenue for the chemical products segment was \$0 due to the closure of our chemical factories since September 1, 2017. We are setting up a new factory in Bohai Park. As a result there were no chemical products for sale for the three-month period ended March 31, 2020.

Natural gas segment

For the three-month period ended March 31, 2020, the net revenue for the natural gas was \$0. On May 29, 2019, the Company received a verbal notice from the government of Tianbao Town, Daying County, Sichuan Province, whereby the Company is required to obtain project approval for its well located in Daying, including the whole natural gas and brine water project, and approvals for safety production inspection, environmental protection assessment, and to solve the related land issue. Until these approvals have been received, the Company has to temporarily halt trial production at its natural gas well in Daying. Based on the government new policies, the Company is also required to obtain an exploration license and a mining license for bromine and natural gas, respectively.

For the three-month period ended March 31, 2019, the net revenue for the natural gas was \$38,570. We commenced natural gas trial production from January 2019.

Cost of Net Revenue

Segment	Cost of Net Revenue by Segment				Percent Change of Cost of Net Revenue
	Three-Month Period Ended March 31, 2020		Three-Month Period Ended March 31, 2019

Total	\$ 921,320	100%	\$ 36,407	100%	2431%

Cost of net revenue reflects mainly the raw materials consumed and the direct salaries and benefits of staff engaged in the production process, electricity, depreciation and amortization of manufacturing plant and machinery and other manufacturing costs.

Bromine production capacity and utilization of our factories

The table below represents the annual capacity and utilization ratios for all of our bromine producing properties:

	Annual Production Capacity (in tonnes)	Utilization Ratio (i)
Three-month period ended March 31, 2019	31,506	—
Three-month period ended March 31, 2020	31,506	5%
Variance of the three-month periods ended March 31, 2020 and 2019	—	—

(i) Utilization ratio is calculated based on the annualized actual production volume in tonnes for the periods divided by the annual production capacity in tonnes.

Our utilization ratio was 5% for the three-month period ended March 31, 2020 as only two factories resumed operations in March 2020.

Our utilization ratio was 0% for the three-month period ended March 31, 2019 was due to the closure of our plant and factories to perform rectification and improvement.

Bromine segment

For the three-month period ended March 31, 2020 the cost of net revenue for the bromine segment was \$609,820.

For the three-month period ended March 31, 2019, the cost of net revenue for the bromine segment was \$0 due to the closure of our plant and factories to perform rectification and improvements. As a result, there was no bromine in inventory for sale for the three-month period ended March 31, 2019.

Crude salt segment

For the three-month period ended March 31, 2020 the cost of net revenue for the crude salt segment was \$311,500.

The cost of net revenue for our crude salt segment for the three-month period ended March 31, 2019 was \$0 due to the closure of our plant and factories to perform rectification and improvements.

Chemical products segment

Cost of net revenue for our chemical products segment for the three-month period ended March 31, 2020 and 2019 was \$0 due to the closure of our chemical factories since September 1, 2017. We are setting up a new factory in Bohai Park. As a result there were no chemical products for sale for the three-month period ended March 31, 2020 and 2019.

Natural gas segment

Cost of net revenue for our natural gas segment for the three-month period ended March 31, 2020 was \$0.

Cost of net revenue for our natural gas segment for the three-month period ended March 31, 2019 was \$36,407. We commenced natural gas trial production from January 2019.

Gross Profit(Loss) Gross loss was \$363,650, or 65%, of net revenue for three-month period ended March 31, 2020, representing a decrease of \$365,813 (or 16912%), as compared to a gross profit of \$2,163, or 6%, of net revenue for the same period in 2019.

Bromine segment

For the three-month period ended March 31, 2020, the gross loss margin for our bromine segment was 32% . This 32% decrease was primarily attributable to the increase in factory overhead per unit produced due to lower volume of production.

For the three-month period ended March 31, 2019, the gross profit margin for our bromine segment was 0% due to the closure of our plant and factories to perform rectification and improvements. As a result, there was no bromine in inventory for sale for the three-month period ended March 31, 2019.

Crude salt segment

For the three-month period ended March 31, 2020, the gross loss margin for our crude salt segment was 229%. This 229% decrease was primarily attributable to the increase in factory overhead per unit produced due to lower volume of production.

For the three-month period ended March 31, 2019, the gross profit margin for our crude salt segment was 0% due to the closure of our plant and factories to perform rectification and improvements.

Chemical products segment

For the three-month period ended March 31, 2020, the gross profit margin for our chemical segment was 0% due to the closure of our plant and factories to perform rectification and improvement. All chemical products inventories were sold as of March 31, 2019. As a result, there were no chemical products for sale for the three-month period ended March 31, 2020.

Natural gas segment

For the three-month period ended March 31, 2020, the gross loss margin for our natural gas segment was 0%.

The gross profit margin for our natural gas segment for the three-month period ended March 31, 2019 was 6%.We commenced natural gas trial production from January 2019.

Direct labor and factory overheads incurred during plant shutdown On September 1, 2017, the Company received notification from the government of Yangkou County, Shouguang City of PRC that stated that production at all its bromine and crude salt and chemical factories should be halted with immediate effect in order for the Company to perform rectification and improvement in accordance with the county's new safety and environmental protection requirements. On November 24, 2017, the Company received a letter from the Government of Yangkou County, Shouguang City notifying the Company to relocate its two chemical production plants located in the second living area of the Qinghe Oil Extraction Plant to Bohai Park. As a result, direct labor and factory overhead costs (including depreciation of plant and machinery) in the amount of \$3,610,423 and \$4,293,022 incurred for the three-month periods ended March 31, 2020 and 2019, respectively, of factories that have not resumed production were presented as part of the operating expense.

General and Administrative Expenses General and administrative expenses were \$843,337 for the three-month period ended March 31, 2020, a decrease of \$1,261,834 (or 60%) as compared to \$2,105,171 for the same period in 2019.

Loss from Operations Loss from operations was \$4,835,429 the three-month period ended March 31, 2020, compared to loss from operation of \$6,396,030 in the same period in 2019.

Bromine segment

Loss from operations from our bromine segment was \$2,866,438 for the three-month period ended March 31, 2020, compared to loss from operations of \$3,625,014 in the same period in 2019. This decrease in loss was mainly due to the resumption of production in March 2020.

Crude salt segment

Loss from operations from our crude salt segment increased to \$1,513,582 for the three-month period ended March 31, 2020, compared to loss from operations of \$1,411,809 in the same period in 2019. This increase in loss was mainly attributable to an increase in depreciation and amortization of manufacturing plant and machinery and other manufacturing costs allocated to our crude salt segment for the three-month period ended March 31, 2020 compared to the same period in 2019 resulting from the changes in the average selling price and production volume used to arrive at the allocation ratio of common costs in the two periods.

Chemical products segment

Loss from operations from our chemical products segment was \$710,909 for the three-month period ended March 31, 2020, compared to loss from operations of \$673,550 in the same period in 2019.

Natural gas segment

Loss from operations from our natural gas segment was \$48,846 for the three -month period ended March 31, 2020, compared to a loss of \$41,983 in the same period in 2019.

Other Income Net Other income, net of \$39,228 represented bank interest income, net of capital lease interest expense for the three -month period ended March 31, 2020, a decrease of \$57,527 (or approximately 59%) as compared to the same period in 2019.

Net Loss Net loss was \$3,539,758 for the three-month period ended March 31, 2020, compared to a net loss of \$4,904,138 in the same period in 2019.

Effective Tax Rate Our effective tax rate for the three-month periods ended March 31, 2020 and 2019 was 26% and 22% respectively. The effective tax rate for the three-month period ended March 31, 2020 was 1% higher than the PRC statutory income tax rate of 25%, mainly due to non-taxable items net of decrease in change in valuation allowance. The effective tax rate for the three-month period ended March 31, 2019 was 3% lower than the PRC statutory income tax rate of 25%, due to non-deductible expense net of non-taxable items.

LIQUIDITY AND CAPITAL RESOURCES

As of March 31, 2020, cash and cash equivalents were \$93,632,690 as compared to \$100,301,986 as of December 31, 2019. The components of this decrease of \$6,669,296 are reflected below.

Statement of Cash Flows

	Three-Month Period Ended March 31,	
	2020	2019
Net cash provided by (used in) operating activities	\$ 2,202,357	\$ (263,726)
Net cash used in investing activities	\$ (7,416,211)	\$ (2,528,111)
Effects of exchange rate changes on cash and cash equivalents	\$ (1,455,442)	\$ 3,446,043
Net increase(decrease) in cash and cash equivalents	<u>\$ (6,669,296)</u>	<u>\$ 654,206</u>

For the three-month period ended March 31, 2020, we met our working capital and capital investment requirements mainly by using cash on hand.

Net Cash (Used in) Provided by Operating Activities

During the three -month period ended March 31, 2020, cash flow provided by operating activities of approximately \$2.2 million was mainly due to a decrease in accounts receivable of \$4.2 million, and a non-cash adjustment related to depreciation and amortization of property, plant and equipment, reduced by a net loss of \$3.5 million and an adjustment for income tax benefit of \$1.2 million.

During the three-month period ended March 31, 2019, cash flow used in operating activities of approximately \$0.3 million, mainly due to (i) substantial non-cash charges in the amounts of approximately \$2.5 million, mainly in the form of depreciation and amortization of property, plant and equipment and exchange loss on intercompany balances; partially offset by deferred tax assets; and (ii) cash generated from working capital of approximately \$2.1 million, which mainly consisted of the increase in other payable and accrued expenses; partially offset by taxes payable.

Accounts receivable

Cash collections on our accounts receivable had a major impact on our overall liquidity. The following table presents the aging analysis of our accounts receivable as of March 31, 2020 and December 31, 2019.

	March 31, 2020		December 31, 2019	
		% of total		% of total
Aged 1-30 days	\$ 620,669	100%	\$ —	—
Aged 121-150 days	—	—	506,703	10%
Aged 151-180 days	—	—	2,368,495	49%
Aged 181-210 days	—	—	2,001,908	41%
Total	\$ 620,669	100%	\$ 4,877,106	100%

The overall accounts receivable balance as of March 31, 2020 decreased by \$4,256,437, as compared to those of December 31, 2019. We have policies in place to ensure that sales are made to customers with an appropriate credit history. We perform ongoing credit evaluation on the financial condition of our customers. No allowance for doubtful accounts for the three-month period ended March 31, 2020 is required.

Inventory

Our inventory consists of the following:

	March 31, 2020		December 31, 2019	
		% of total		% of total
Raw materials	\$ 16,096	2%	\$ 20,928	3%
Finished goods	658,882	98%	669,159	97%
Total	\$ 674,978	100%	\$ 690,087	100%

The net inventory level as of March 31, 2020 decreased by \$15,109 (or 2%), as compared to the net inventory level as of December 31, 2019.

Raw materials decreased by \$4,832 as of March 31, 2020 as compared to December 31, 2019.

Our finished goods decreased by \$10,277 as of March 31, 2020 as compared to December 31, 2019.

Net Cash Used in Investing Activities

For the three-month period ended March 31, 2020, we used approximately \$7.4 million to acquire property, plant and equipment.

For the three-month period ended March 31, 2019, we used approximately \$2.5 million to acquire property, plant and equipment.

Net Cash Used in Financing Activities

We have no financing activities for the three-month periods ended March 31, 2020 and 2019.

We believe that our available funds and cash flows generated from operations will be sufficient to meet our anticipated ongoing operating needs and our obligations as they fall due in the next twelve (12) months.

We had available cash of approximately \$93.6 million at March 31, 2020, most of which is in highly liquid current deposits which earn no or little interest. We do not anticipate paying cash dividends in the foreseeable future.

We intend to continue to focus our efforts on the activities of SCHC, SYCI and DCHC as these segments continue to expand within the Chinese market.

We may not be able to identify, successfully integrate or profitably manage any businesses or business segment we may acquire, or any expansion of our business. An expansion may involve a number of risks, including possible adverse effects on our operating results, diversion of management's attention, inability to retain key personnel, risks associated with unanticipated events, risks associated with the COVID-19 pandemic and the financial statement effect of potential impairment of acquired intangible assets, any of which could have a materially adverse effect on our condition and results of operations. In addition, if competition for acquisition candidates or operations were to increase, the cost of acquiring businesses could increase materially. We may effect an acquisition with a target business which may be financially unstable, under-managed, or in its early stages of development or growth. Our inability to implement and manage our expansion strategy successfully may have a material adverse effect on our business and future prospects.

Contractual Obligations and Commitments

We have no significant contractual obligations not fully recorded on our condensed consolidated balance sheets or fully disclosed in the notes to our condensed consolidated financial statements. Additional information regarding our contractual obligations and commitments at March 31, 2020 is provided in the notes to our condensed consolidated financial statements. See "Notes to Condensed Consolidated Financial Statements, Note 19— Capital Commitment and Other Service Contractual Obligations".

Material Off-Balance Sheet Arrangements

We do not currently have any off -balance sheet arrangements falling within the definition of Item 303(a) of Regulation S-K.

Critical Accounting Policies and Estimates

Our consolidated financial statements have been prepared in accordance with accounting principles generally accepted in the United States of America and this requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities at the date of the consolidated financial statements and the reported amounts of revenues and expenses during the reporting period. We base our estimates on historical experience and on various other assumptions that are believed to be reasonable under the circumstances. Accordingly, actual results may differ significantly from these estimates under different assumptions or conditions. We have identified the following critical accounting policies and estimates used by us in the preparation of our financial statements: accounts receivable and allowance for doubtful accounts, inventories and allowance for obsolescence, assets retirement obligation, property, plant and equipment, recoverability of long lived assets, mineral rights, leases, revenue recognition, income taxes, and loss contingencies. These policies and estimates are described in the Company's Form 10-Q for the three months ended March 31, 2020.

Item 3. Quantitative and Qualitative Disclosures About Market Risk

Pursuant to Item 305(e) of Regulation S-K (§ 229.305(e)), the Company is not required to provide the information required by this Item as it is a “smaller reporting company,” as defined by Rule 229.10(f)(1).

Item 4. Controls and Procedures**(a) Evaluation of Disclosure Controls and Procedures**

We maintain disclosure controls and procedures (as such term is defined in Exchange Act Rules 13a-15(e) and 15d-15(e)) that are designed to ensure that information required to be disclosed in our reports filed pursuant to the Exchange Act is recorded, processed, summarized and reported within the time periods specified in the SEC’s rules, regulations and related forms, and that such information is accumulated and communicated to our management, including our Chief Executive Officer (“CEO”) and Chief Financial Officer (“CFO”), as appropriate, to allow timely decisions regarding required disclosure.

Under the supervision and with the participation of our management, including our CEO and CFO, we conducted an evaluation of the effectiveness of the design and operation of our disclosure controls and procedures as of the end of the period covered by this report. Based on this evaluation, our CEO and CFO concluded that our disclosure controls and procedures were effective as of the end of the period covered by this Form 10-Q.

(b) Changes in internal controls

There were no changes in our internal control over financial reporting (as such term is defined in Rules 13a-15(f) under the Exchange Act) during our most recently completed fiscal quarter that have materially affected, or are reasonably likely to materially affect, our internal control over financial reporting.

PART II—OTHER INFORMATION

Item 1. Legal Proceedings

On or about August 3, 2018, written decisions of administration penalty captioned Shou Guo Tu Zi Fa Gao Zi [2018] No. 291, Shou Guo Tu Zi Fa Gao Zi [2018] No. 292, Shou Guo Tu Zi Fa Gao Zi [2018] No. 293, Shou Guo Tu Zi Fa Gao Zi [2018] No. 294, Shou Guo Tu Zi Fa Gao Zi [2018] No. 295 and Shou Guo Tu Zi Fa Gao Zi [2018] No. 296 (together, the “Written Decisions”) were served on Shouguang City Haoyuan Chemical Company Limited (“SCHC”) by the Shouguang City Natural Resources and Planning Bureau (the “Bureau”), naming SCHC as respondent. The Written Decisions challenged the land use of Factory nos. 2, 9, 7, 4, 8 and 10, respectively, and alleged, among other things, that SCHC had illegally occupied and used the land in the total area of approximately 52,674 square meter, on which Factory nos. 2, 9, 7, 4, 8 and 10 were built. The Written Decisions ordered SCHC, among other things, to return the land subject to the Written Decisions to its respective legal owner, restore the land to its original state, and demolish or confiscate all the buildings and facilities thereon and pay monetary penalty of approximately RMB 1.3 million (\$184,000) in the aggregate. Each of the Written Decisions were to be executed within 15 days upon serving SCHC. Additional interest penalties would be imposed at a daily rate of 3% in the event that SCHC did not make the monetary penalty payment in a timely manner. As discussed below, the Company did not believe the local government would enforce the penalties so it did not make the payment. Subsequently, the Bureau filed enforcement actions to the People’s Court of Shouguang City, Shandong Province (the “Court”), naming SCHC as enforcement respondent and alleged, among other things, that SCHC failed to perform its obligations under each of the Written Decisions within the specified timeframe. The enforcement proceedings sought court orders to enforce the Written Decisions. On May 5, 2019, written decisions of administrative ruling captioned (2019) Lu 0783 Xing Shen No. 384, (2019) Lu 0783 Xing Shen No. 385, (2019) Lu 0783 Xing Shen No. 389, (2019) Lu 0783 Xing Shen No. 390, (2019) Lu 0783 Xing Shen No. 393, and (2019) Lu 0783 Xing Shen No. 394, respectively (together, the “Court Rulings”) were made by the Court in favor of the Bureau. The Court ordered, among other relief, to enforce each of the Written Decisions, to return each subject land to its legal owner and demolish or confiscate the buildings and facilities thereon and restore the land to its original state within 10 days from the service of the Court Rulings on SCHC. The Court Rulings became enforceable immediately upon service on SCHC on May 5, 2019.

The Company has been in the process of resolving the issues in connection with SCHC’s land use and planning diligently. The Company has been in close discussions with the local government authorities with the help from Shouguang City Bromine Association to seek reliefs and, based on verbal confirmation by local government authorities, believes the administrative penalties imposed by the Bureau according to the Written Decisions are being re-assessed by local government authorities and may be revoked. As of the date of this report, the Company has obtained one written confirmation from the local government authorities that the administrative penalty imposed on Factory No. 7, Factory No. 8 and Factory No.10 are being revoked which are subject to the Court formal approval, and production of Factory No. 7 was allowed to resume in April 2019. The Bureau filed an application, dated October 28, 2019, to the Court to withdraw the enforcement actions that were filed against SCHC to seek court orders to enforce Written Decisions No. Shou Guo Tu Zi Fa Gao Zi [2018] No. 293, Shou Guo Tu Zi Fa Gao Zi [2018] No. 295 and Shou Guo Tu Zi Fa Gao Zi [2018] No. 296. In addition, on August 28, 2019, the People’s Government of Shandong Province, issued a regulation titled “Investment Project Management Requirements of Chemical Companies in Shandong Province” permitting the construction of facilities on existing sites or infrastructure of bromine manufacturing and other chemical industry-related types of projects (clause 11 of section 3). The Company believes that the goal of the government is to standardize and regulate the industry and not to demolish the facilities or penalize the manufacturers. As of the date of this report, the Company has not been notified by the local government that it will take any measure to enforce the administrative penalties. Based on information known to date, the Company believes that it is remote that the Written Decisions or Court Rulings will be enforced within the expected timeframe and a material penalty or costs and expenses against the Company will result. However, there can be no assurance that there will not be any further enforcement action, the occurrence of which may result in further liabilities, penalties and operational disruption.
